I am a Backend developer with over 10 years of experience in the field. I consider myself a strong senior level developer and specialize in Golang and Node.js. I am also confident in Frontend development in Vue.js.

I am driven by the desire to create stable and high-performance applications. I'm always looking for new challenges and opportunities to further improve the product, while upgrading my skills.

In addition, I have experience in leading a team of 4 developers. I share knowledge, help to find optimal solutions and point out errors constructively. I strive to identify problems at the stage of code review.

Lead Developer (2024 - 2025)

T-Bank

Banking / AI Center

OCR/ML, Golang, gRPC, NVIDIA Triton, Kafka, S3, Kubernetes, Gitlab CI, load testing (pandora, ghz), quality testing (ML metrics, dataset preparation, result analysis), VueJs.

Development of the Smart Camera backend. Optimization of GPU/CPU resources. Web-based system for storage, review, and analysis of Smart Camera sessions. Development of an AI-based moderation service.

Senior Lead Developer (2018 - 2024)

HitBTC

Cryptocurrency Exchange / Business intelligence

Blockchain, Fintech, BI, Golang, Nodejs, Vuejs, Vite, Highcharts, InfluxDB, Solidity, Ethers.js, dApps, Docker, CI/CD

Creating and developing BI systems. Storing, processing and presenting large amounts of data. Creating smart contracts and dApps for them. Managing a development team.

Senior Backend Developer (2017 - 2018)

Changelly

Cryptocurrency exchange

Blockchain, Nodejs, Web3, Express.js, Sequelize, MySQL
Working with API of cryptocurrency exchanges and Blockchain API. Finalization of the currency exchange algorithm. Integration of new blockchain networks.

Nodejs Developer (2014 - 2017)

Viboom

Video Ads

Nodejs, Express.js, Webpack, Socket.io, MySQL, MongoDB, Redis, Cassandra, Clickhouse, Highload, CI/CD, DevOps
Development of a high load ad server. Deployment and monitoring. Creation and development of the team's infrastructure services.

Junior Javascript Developer (2012 - 2014)

Kodeks

Document Management

Nodejs, jQuery, PostgreSQL
Development of backend components. Working with libraries and frameworks. Working with version control system.

Education

ITMO University

Information Technologies and Programming

Information Systems and Technologies

2008 - 2013

Key skills

Nodejs + Golang + Vuejs

MySQL + WebSockets + Clickhouse + Blockchain + Solidity + Docker + CI/CD
